

Amendments to the Specification:

Please add the following new paragraph after the paragraph ending on line 5 of page 16:

As shown, the drums 214 (herein also referred to as rollers) are aligned along a horizontal plane. Wrapped around the two drums 214, the polishing pad 208 defines a first horizontal plane and a second horizontal plane. The first horizontal plane defines the top of the polishing pad 208 while the second horizontal plane defines the bottom of the polishing pad 208. As can be seen, the first horizontal plane, the second horizontal plane, and the horizontal plane containing the drums 214 are parallel to each other.
